Mission: North Teller Build a Generation is a Community Coalition Collaborating to Strengthen Youth.

Vision: To have a healthy and strong community in which the growth and welfare of youth is a priority.

You are invited to be listed in a free Woodland Park Therapist/Community Resource Directory. We are contacting local community helping professionals and licensed mental health treatment providers to be part of this resource. This list will be provided to you by e-mail and to the team members of the North Teller Build a Generation (NTBAG) Coalition.

NTBAG is an innovative, long-term planning process based on the "Communities that Care" Model of risk and protective factor-focused prevention, and the Social Development Strategy, and has been in this community since 1999. This is a long-term planning process involving a community coalition to address prevention of problem behaviors. NTBAG currently has 21 members representing collaborative partners from multiple sectors of the community and who serve on our Community Prevention Policy Board. Independently and collectively these partners work with children, youth and families, and include: the Woodland Park RE-2 School District, Woodland Park Police Department, Teller County Sheriff's Office, Teller County Public Health, Teller County Department of Social Services, the Community Partnership Family Resource Center, Woodland Park Parks and Recreation Department, Rampart Library, Mental Health professionals, CHOICES (Teller Pregnancy Resource Center), TESSA, CASA, the faith community, the business community, community members, parents, and youth representatives.

One of the priorities for the current work of the NTBAG Coalition is to focus on mental health, including improving access to mental health resources and reducing the stigma sometimes associated with seeking mental health services. It is hoped that having a mental health directory for the community will provide better access to individuals and agencies that make referrals to community members for the resources they need. The information may be shared with the community at large.
