(framing, sheathing, insulation, and window flashing inspections may be required.)

RETAINING WALL REQUIREMENTS

- ___ All retaining walls over 4 feet in height (as measured from the bottom of the footing or base to the top of the wall) require a permit and corresponding engineering.
- ___ All retaining walls (regardless of height) that support a surcharge require a permit and corresponding engineering.

NOTE: An additional retaining wall can be placed a minimum of one and a half times the height of the previous wall away and to not be considered a one-wall assembly.

SET BACK REQUIREMENTS:

***A survey is required if the structure is placed within 5’ of the required setback.**

R1, R1-M Zones

- 25’ from Front property line *30’
- 15’ from Side property line *20’
- 30’ from Rear property line *35’

A-1 Zones

- 50’ from All property line *55’

C1- Inside a Growth Area

- 10’ from Front property line
- 0’ from Side property line
- 20’ from Rear property line
- 35’ Max Height

C1- Outside a Growth Area

- 50’ from Front property line
- 0’ from Side property line
- 20’ from Rear property line
- 35’ Max Height

All property corners, and any intermediate points necessary, must be clearly marked at the time of the first inspection. Property corners must be marked with stakes tall enough to be easily viewed above vegetation or accumulated snow. Setback requirements are measured at a 90° angle from the property line. The setbacks are measured from the relative position of the property line (i.e. the front setback is measured from the front property line, which is not necessarily the front of the building). If the property is abutting a road or road right of way this is considered a front and needs to meet the front yard minimum setback requirement. Be advised that improper placement of the structure will not be considered justification for the granting of a variance. If your structure is placed too close to the property line you may be required to move the structure, or purchase additional property.
