Teller County Public Health and Environment (TCPHE) is currently tracking other outbreaks of Coronavirus (COVID-19) associated with events held at the conference center at Andrew Wommack Ministries, Inc. (AWMI) in Teller County.

An outbreak is defined as two or more confirmed cases at a given location within 14 days.

If you develop [symptoms](#) consistent with COVID-19:

- Follow [these isolation instructions](#) at <https://covid19.colorado.gov/how-to-isolate>
- Get [tested](#).
- Stay home from work and avoid other activities around other people.
- Seek medical care and testing for COVID-19; call your doctor before you show up.

TCPHE will communicate directly with all known close contacts of the those who have tested positive. If you have not received communication from Public Health, it is unlikely that you had any prolonged exposure to the ill person. "Close contact" is defined as being within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to test specimen collection) until the time the patient is isolated.

If you do not have symptoms, you do not need to do anything differently. If you choose to get tested for COVID-19 without symptoms, do so 7-10 days after the possible exposure. Be aware that a negative test result does not mean that you will not develop symptoms or become infected after the test. A negative test result only means that you did not have virus detected at the time of testing. Medical insurance may not cover the cost of asymptomatic testing unless you are identified as a close contact of a case.

Teller County will begin posting all local outbreak information on the [teller-covid.com](http://teller-covid.com) and Teller County websites, beginning the week of November 1, 2020.

If you have further questions, please contact your local public health agency.
